NEW FRONTIERS IN INTEGRATING NATURAL CAPITAL AND ECOSYSTEM SERVICES INTO DECISION-MAKING

SPEAKER:

Prof. ROBERTO PASTÉN CARRASCO

Universidad de San Sebastián,
CEDES – Chile

MODERATOR:

Prof. Mauro Viccaro

University of Basilicata,
DAFE – Italy

The concept of Natural Capital represents the foundation of economic systems and human well-being.

During the seminar, theoretical and practical tools for integrating the value of nature into decision-making, accounting, and policy processes will be explored, with a focus on Latin American experiences.

Topics covered:

- From the assessment of ecosystem services to natural capital
- Integrating the science of ecosystem services into decision-making
- The economics of natural capital and the importance of spatial-economic evaluation at the sub-national level
- Examples from around the world and a pilot case study in Chile

“Recognizing the value of Natural Capital is the first step toward a truly sustainable economy.”

Organized by:

DAFE – University of Basilicata, Italy

CEDES – Universidad de San Sebastián (Chile)
